## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim. The claim is a single step claim.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: definite steps for providing the bloodflow passageway including the provision of a bloodflow conduit connecting a chamber of the heart to a port formed in a selected vein.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6, there is no nexus between the step of blocking the lumen of the coronary vein and the creating of the transmyocardial bloodflow passageway.

Claim 7 appears to be incomplete.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 09/710,332

Art Unit: 3738

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by either of Aldea (553957) or Lundquist et al (4865581).

As broadly worded, the claims fail to define over the steps set forth in each of Aldea and Lundquist et al. See columns 8 and 9 of Aldea and columns 7 and 8 of Lundquist et al.
